

▣ ID-TOTEM terminal

State-of-the-arts Ergonomics

ID-TOTEM is an ultra-slim model using the latest technology as Touch Screen, WIFI, Bluetooth...

The advanced ergonomic study of ID-TOTEM distinguishes it from all the other interactive terminals. ID-TOTEM is intended for the interactive consultation of diverse types of program (you can install your own interactive programs or we can develop the program you want designed for touch screen), and can be used in places such as reception halls, conference rooms etc., where one wishes to display a high resolution image, uncomparable in quality to larger terminals. ID-TOTEM can be made in a number looks, from epoxy aluminum to several optional laminate decorations, or in one of the diverse available laminated wood turpentines. The mounting and base structure of the terminal are very stable.

Hardware specs

- 17" touch screen terminal
- CPU : 2.5 Ghz
- RAM : 512MB DDR
- HDD : 40 Go
- NETWORK : RJ45 LAN, Wifi, Bluetooth

Terminal specs

- Epoxy aluminium structure
- The terminal can be locked with a key
- WxHxD (mm) : 450 x 1450 x 100
- Net Weight : around 40 kg
- Screen : 110 mm from the floor
- Regular Color : black or white
- Power: 300 VA / 180W
- Operation Temperature: 0 to 45°C
- Operation Moisture: Between 5 and 85%
- Noise: <40 DB

3 years warranty

- Terminal: 1 year
- Hardware: 3 years

Conformity

- CE Norm
- Can be used by disabled people
- Fire specs: M0
